Royal Queensland Yacht Squadron

**Design & Construction By:**  
Tension Span Structures Pty Ltd

**Architects:**  
Robin Spencer Associates

**Project Location:**  
Manly, Brisbane, Australia

## Alfresco Dining Covered by Tension Span®

Tension Span has completed a rebuild and expansion of the alfresco dining area using a novel and innovative tension membrane structure design.

Working closely with Architects, the design meshed with very complex geometry of the existing clubhouse and foundations. Three canopies blend together in a play of light and colour. The new structures feature a spectacular external mast supporting the east end with existing conical hexagonal rebuilt at the west end.

Soft natural light and superb detailing with all stainless fittings have produced a visually pleasing and delightful ambience for members and guests of this home of Yachting in Queensland.
