

Introducing Flexshade® Quad™

If your clients are looking for high quality shade at an affordable price, consider our new **Flexshade® Quad™ Series** of engineered tension membrane structures.

These are designed for 148km/hr (90mph) wind loads and long life (10 year Warranty is standard).

The Quad™ Series are designed with either a curved or straight column, you decide.

Quad™ can be linked using our unique link panels providing flexibility and weatherproof cover to suit many layouts.
